

## **Gardening group Wed. Aug. 5th. '09**

We were very lucky with the weather when 14 of us arrived at Ken-Caro garden nr. Liskeard, the sun was shining! We were welcomed by Mr.& Mrs. Willcock who started the garden in 1970 when they were farming the land. Twenty years ago they began extending the garden (now 4 acres) into the meadow.

The design of wide winding grass paths & large island beds blends with beautiful distant views.

The planting is very eye catching, colourful & contrasting, especially the many types & colours of the hydrangea family.

The large pond has lovely water lilies attractive marginal plants including huge gunnera & striking ligularia.

We finished our visit our visit in the summer house with tea, biscuits & fantastic views.
